### THE ENEMY WITHIN

Announcements by the Leader of the Opposition say that he has complained to foreign countries and to financial institutions throughout the world, which lend or might lend money to Belize and Belizeans for the development of the country on the subject of the finding by the Supreme Court of Belize that the Chief Justice was unconstitutionally appointed.

The lady who runs the zoo, likewise, has announced that she has flooded the world and other international organizations on the subject that Belize is considering the building of a dam in order to improve the supply of electricity and to make current cheaper for Belizeans. This is the same lady who praised the Malaysian loggers in Toledo.

In both cases these complaints relate to domestic issues which affect Belizeans and their way of life. In the past we have resented the interference of foreigners and foreign institutions and countries in our domestic affairs. While we have witnessed countries, like international bullies, tyrannically by force intervene in matters which are the responsibility and affairs exclusively of other countries, the question for us is whether this is consistent with the way of life of Belizeans, whether it meets the way we wish our future to be decided, and whether it represents conduct which we find tolerable for foreigners and foreign countries to dictate to us how we run our own affairs.

Part of the decision which we need to make, depends upon our judgement of the objective or purpose of those who invite aliens to inter-meddle in our domestic affairs, whether national or alien. Clearly persons who so act do so out of their assessment of their own incompetence to persuade nationals to accept their point of view. In frustration therefore, they turn to foreign elements in the hope of finding, outside of Belize, those who might wish to impress Belizeans with a point of view which they have already rejected. To become involved in this activity which represents a deliberate attempt to subvert the wishes of the people of Belize, smacks of treachery.

A closer examination, however, of these subversive plans and objectives, disclose that complaints are directed to those who it is hoped might be prepared to impose their will on the people of Belize, by threats, by causing harm to the country, or by withdrawing help and support for the economy which serves Belizeans. This is a horse of a different colour. It is the disclosure of persons who set out to do harm to Belizeans and their way of life. What high crimes of misdemeanors must Belizeans attach to these desperate acts? Acts, which are inimical to Belize and Belizeans perpetuated by people who can only be regarded as enemies of the best interest of the people!
