

STAN!! THE SMILING C.E.O OF FORTIS/BEL

H. Stanley Marshall

Have you read your Chalillo Dam E.I.A????

- Pg 49 Main Report: "The dam will be 49.5 meters high"
- Pg 2. Vol 2 Forestry Report: "The dam will be 30 meters high"

**THIS IS A DIFFERENCE OF 60 FEET!!
STAN!! WHICH IS IT????**

Pg 16 Main Report: "The dam will last 500 years"

Pg 165 Main Report "The dam will last 50 years"

THIS IS A DIFFERENCE OF 450 YEARS!!!

Stan!!! Which is it?

In this 5 volume EIA there is no statement telling us that our electricity rates will be reduced due to Chalillo!!!!

Stan!!! Why Not?

Pg 231 Main Report:

FORTIS/BEL talks about "Job Opportunities". "Chalillo will be remotely operated and will employ no more than 12 people"

Pg 287 Main Report

"Mercury levels in fish will be monitored"

STAN!!! The EIA fails to state that methylmercury, forming from the dam development, is a **Central Nervous Systems Poison** and suspected to cause **Birth Defects!!!!**

The children of Canada are safe from Chalillos' dark profile, right, Stan??

But what about our children??

Fortis, Forget It!!!

The Macal River Is Ours!!

Damn The Dam!!
